

Control Thermostats

RAK-TR.1..

Electromechanical TR

- 2-position control thermostat with single-pole changeover microswitch
- **Switching capacity** contact connection 1-2: 10 (2.5) A, AC 250 V, (DIN3440)
contact connection 1-3: 6 (2.5) A, AC 250 V
- Time constant conforming to DIN 3440
- 3 mounting choices: pipe, pocket or wall mounting
- External setting knob for setpoint adjustment

Use

Typical applications:

- Heat generation plant
- For general use in heating, ventilation and air conditioning plant

Function

Changeover switch
(S.P.D.T.)

When the setpoint is reached on rising temperature, contact connection 1-2 changes over to contact connection 1-3. When the temperature of the medium falls by the value of the switching differential, the control thermostat reverts to contact connection 1-2.

Changeover contact TR version

Type summary

Standard set	Temperature setting range	Capillary tube length	Scope of delivery	Pocket length ¹⁾
RAK-TR.1000B	15...95 °C	700 mm	Pocket (for RAK...B) /	100 mm
RAK-TR.1000S	15...95 °C		Clamping band for max. pipe dia. 100 mm /Cable gland M16x1.5 mm /	---
RAK-TR.1210B	15...82 °C		Mounting instructions	100 mm

1) Pocket ALT-SB100, brass, PN10

Accessories

Refer to Data Sheets N1193 and N1194.

Ordering

When ordering, please give type reference according to "Type summary" (standard set).

If the accessories required are not those included in the standard set, they can be ordered separately according to the type references given in Data Sheets N1193 and N1194.

Mechanical design

Housing

The base of the thermostat is made of PA (reinforced) and is designed for pipe, pocket or wall mounting; the electromechanical control thermostat (TR) uses a capillary type sensing element.

The cover is made of ABS + PC and accommodates the freely accessible setpoint setting knob.

The cable gland is M16x1.5 mm.

Notes

Mounting aid

Installation Instructions are enclosed in the package.

Mounting location

It must be ensured that there is sufficient clearance above the thermostat for adjusting the setpoint and for removing and replacing the thermostat, if required.

Pipe mounting

The clamping band should be properly tightened to ensure the entire length of the sensing element is in close contact with the pipe's surface.

Protection pocket mounting

Mount the pocket and adjust the hexagon as required. Immerse the capillary sensing element in the pocket and secure the base to the pocket by means of the screw.

Wall mounting with sensing element in the pocket

To prepare for wall mounting, knock out the fixing holes in the housing and pull out the capillary tube until the required length is reached. After immersing the capillary sensing element in the pocket, secure it with a clamp (mounting accessories).

Wiring

The appliance must be wired by the installer only.

The cables used must meet the insulation requirements for mains voltage.

Wire the thermostat according to the connection diagram and in compliance with local regulations.

Max. AC 250 V

Caution: prior to opening the housing, disconnect the thermostat from the mains supply.

Earth connections must be made in compliance with the regulations.

Disposal

The device is considered an electronics device for disposal in terms of European Directive 2012/19/EU and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

Technical data

Switching mechanism	Switching capacity		
	Nominal voltage	AC 24...250 V	
	Nominal current I_M	contact connection 1-2	0.1... 10 (2.5) A
		contact connection 1-3	0.1... 6 (2.5) A
	External fuse	10 A	
	Life expectancy at nominal rating:	Contact 1-2	min. 250'000 switching cycles
		Contact 1-3	min. 100'000 switching cycles
	Safety class	I to EN 60 730	
	Degree of protection:	IP 43 to EN 60 529
