

DBZ1196

AlgoRex

Base adapter MS6 / DS11

-
- For the modernization of MS6 fire detection systems
 - Simple replacement of MS6 detectors with DS11 detectors
 - For exchanging detectors simply and quickly
 - For all series 6 bases, surface or semi-recess-mounted

Characteristics

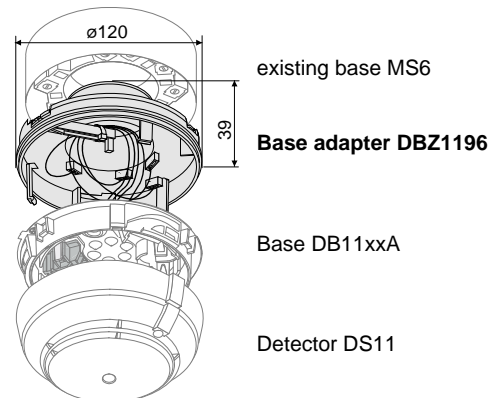

- When buildings are renovated or extensions are built, frequently the fire detection system is modified to bring it up to date.
- The base adapter provides a simple and inexpensive solution.
- A detection system originally designed for series 6 detectors can be equipped with DS11 detectors without altering the existing wiring.

Installation

The replacement of a series 6 detector with a new detector is very simple.

- Connect the corresponding DS11 base to the base adapter.
- Using the MEA6.1 detector exchanger, remove the series 6 detector from the base.
- Using the DZ1191 detector exchanger, insert the base adapter with the DS11 detector in the series 6 base. The base adapter snaps into place to provide a firm connection between the base and adapter. The detector can be subsequently removed with the detector exchanger.
- If the collective address of the fire detector has to be retained, the new detector system can be connected to the existing control unit. On the other hand, a change to the interactive or AnalogPLUS fire detection system calls for a special control unit. Corresponding modification to wiring (combined signal lines) is inevitable in this case.
- Allow an additional 0.2 Ω line resistance for each DBZ1196.

Dimension

Details for ordering

	Type	Part no.	Designation	Weight
Accessories	DBZ1196	BPZ:4788650001	Base adapter, white ~RAL 9010	0.080 kg
	DB1101A	BPZ:4863650001	Base, collective	0.055 kg
	DB1131A	BPZ:4789750001	Base, AnalogPLUS	0.060 kg
	DB1151A	BPZ:4863780001	Base, interactive	0.070 kg
	DBZ1190	BPZ:4585260001	Locking device	0.001 kg
