# Web server OZW775 – ensuring time-saving and cost-efficient operation

The OZW775 Web server is the ideal complement to your Synco™ system and helps ensure cost-optimum operation of your HVAC plant.

**■ Straightforward commissioning**  
Setting up the Web server is very easy. It configures itself automatically by reading all connected Synco devices. Then, it delivers the respective data points.

**■ Access to plant independent of time and location**  
Using a PC equipped with the Web browser, plant can be operated and monitored at any time and from any location. The alarm system delivers any fault status or maintenance messages from your HVAC plant directly via e-mail, SMS, pager or fax. You can respond more quickly, you save time and you can do away with unnecessary service visits.

**■ Energy-saving and efficient operation of plant**  
Reporting functions and the evaluation of all plant data and plant faults enable you to identify potential malfunctions at an early stage and to analyze and prevent them. This means cost and energy savings thanks to optimum and efficient operation of plant.

**■ Protection of investments thanks to expandable system**  
You can extend your HVAC plant at any time. The OZW775 is capable of monitoring up to 300 Synco controllers. This way, special customer needs can be satisfied quickly, at any time.

**■ Decades of experience and high quality standards**  
HVAC plant control is one of the challenges we have been facing for more than 70 years. The incremental development of our products benefits from our in-depth application know-how resulting

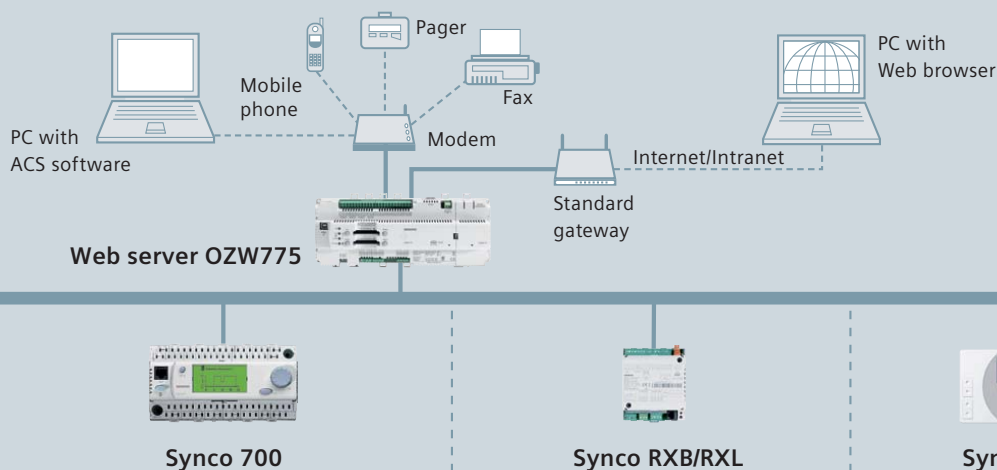

from decades of practical experience and our extensive research work. This ensures the highest product quality and puts us in a position to work with you as your competent partner.

## Highlights

- Straightforward commissioning
- Access to plant independent of time and location
- Energy-saving and efficient operation of plant
- Protection of investments thanks to expandable system
- Decades of experience and high quality standards

## Synco operating

Efficient operation of plant including alarm reporting and operation
