

# Indoor, colour camera – style and functionality come together in one place

The new range of stylish indoor IP cameras from Siemens is specially designed for the home and small business environments. Despite its compact size and stylish exterior, it incorporates many advanced features (motion detection, email notification, dual streaming, etc.) to meet your security requirements ensuring that wherever you are, your home or business are safe. All models, wired or wireless, can be recorded with different devices such as one of the SISTORE MX hybrid recording systems, as well as PC or 3G mobile phones.
