

How can I know this site is safe while no one being here?

The Intelligent Shelter solution creates significant business value by securing network operations. It offers true peace of mind at all times.

Intelligent Shelter is a fully customizable solution offering monitoring, remote control functionality and operational services for unmanned technology sites. The service modules can be combined according to individual customer requirements and local regulations, offering full flexibility and ease of implementation. www.siemens.com/buildingtechnologies

Answers for infrastructure.
