Did you have a safe trip Daddy?

Siemens ensures both traveling passengers and families waiting at airports are always safe and secure.

We provide customized and innovative solutions to heighten security and safety while increasing the energy efficiency of your airport. From world leading fire detection systems, biometric access control, and automated number plate recognition in car parks to intelligent video surveillance and baggage detection. All systems are seamlessly coordinated, monitored, and controlled from a central command and control platform. When you combine this with our experience to save energy in all buildings and facilities, Siemens ensures an efficient, secure, and smooth running airport.
