Siveillance Vantage Mobile Web

www.siemens.com/siveillance-vantage

Siveillance Vantage Mobile Web significantly enhances our command and control solution, Siveillance Vantage, by providing innovative options for integrated communication with mobile resources and personnel, via smartphones or tablet PCs.

Siveillance™ Vantage Mobile Web

- Provides direct data communication between the control center and personnel resources to help ensure that no event information is lost
- Delivers status updates from the mobile resources to ensure that the control center is always up to date concerning their availability and the situation on site when responding to an incident
- Ensures the fastest and most appropriate response to incidents
- Displays and interacts with the Geographical Information System (GIS) and floor plans thus providing full situational awareness to the resources in the field
- Supports a large variety of state-of-the-art smartphone devices
- Convenient and intuitive operation via touchscreen ensures essential information is understood and allows new resources to quickly familiarize themselves with the devices, without extensive training
- Ensures privacy and security of data exchange through HTTPS-based Web communication
- Allows for GPS-based location tracking of the resources

Answers for infrastructure.

Integrated communication with resources

- Sends real-time event notification to mobile resources. Information provided includes:
 - Event type and ID
 - Location details
 - Additional event information as provided through the control center
- Provides up-to-the-minute status updates, ensuring timely and appropriate responses to an incident
- Displays event and resource location within the GIS on the mobile device
- Allows mobile users to view the same maps, icons, site and floor plans, devices available as those in the command and control center
- GIS and site plans displayed on the mobile devices provide zooming and navigation support
- Searches and lists sensor devices located close to your own position, including detailed information and actual status of the device
- Field personnel can create new events and send real-time event details back to the command and control center
- Siveillance Vantage Mobile Web communicates web-based and does not require an app-specific installation

GPS location tracking and e-mail

- Utilizes smartphones' built-in GPS receivers and an app for transmitting the GPS data
- Up-to-date resource location information is always available
- Allows users to select the most suitable and closest resources for responding to incidents
- Communication about incidents via both e-mail and Web pages ensures highest availability of information

Support for multiple smart devices

- Apple iPad with iOS 4.x
- Apple iPhone 3 and 4 with iOS 4.x
- Smartphone with Android 2.2 OS with touchscreen
- Depending on the device's operating system, multi-touch functions (e.g. for zooming in the GIS) are supported

Communication media

Deployment is possible in a customer-provided WLAN network or in public environment via GSM/GPRS/3G/UMTS/4G

Highlights

- Delivers real-time communication between control center and field personnel
- GPS technology improves accuracy and speed of first response
- Compatible with a wide variety of smartphones and hand-held devices
- No app-specific installation required

Safety instructions

Siveillance Vantage Mobile Web allows for alerting critical or life safety incidents, where immediate action of the assigned responders is required. However, interruptions or delays in the communication network or unnoticed alerting messages may cause delays in responding to an incident. Siemens shall not be made liable for any such delays or any damages arising out of such delays.

Ordering information

Order number	Short name	Comments
P54590-P400-A61	Siveillance Vantage Mobile Web server license	Server license for Siveillance Vantage Mobile Web; required 1x per installation
P54590-P401-A61	Siveillance Vantage Mobile Web client license	Single client license for Siveillance Vantage Mobile Web
P54590-P402-A61	Siveillance Vantage Mobile Web client 10 licenses pack	Client licenses for Siveillance Vantage Mobile Web; package of 10 licenses
P54590-P403-A61	Siveillance Vantage Mobile Web client 25 licenses pack	Client licenses for Siveillance Vantage Mobile Web; package of 25 licenses
P54590-P404-A61	Siveillance Vantage Mobile Web client 50 licenses pack	Client licenses for Siveillance Vantage Mobile Web; package of 50 licenses
P54590-P180-A60	Resource management CI	The resource management module of Siveillance Vantage is required for Siveillance Vantage Mobile Web
