# Effective motion detector with integrated KNX interface

AP 251, IP55 motion detector

## Simple setup and operation

The AP 251 motion detector has an integrated KNX interface. Adjustment is simple and easy over an IR remote control. This can also be carried out by the customer himself.

The detector can be blocked and released over the bus. During motion ON and motion OFF, 8-bit scenes can be called up, each with adjustable scene number.

## Advanced technology enables various fields of application

The outer motion detector has an extremely large sensing range of 290°. This is of particular advantage in the case of corner mounting. Another key feature of the detector is its attractive design. It is available in titanium white and anthracite.

The AP 251 motion detector can be used for switching on lighting in the dark and for alarm functions.

## Highlights

- Large sensing angle of 290° - particularly advantageous for corner mounting
- Easy mounting and reliable operation
- Power supply by Bus-control
- Usable for lighting and alarm functions
- Available in the colors titanium white and anthracite
