Differential pressure sensor

For air and non-aggressive gases, with calibration certificate.

- Calibration certificate from the factory
- High degree of measuring accuracy
- Pressure-linear characteristic curve
- Operating voltage AC 24 V / DC 13.5...33 V or DC 11....33 V
- Output signal DC 0...10 V or 4...20 mA
- Simple and fast mounting thanks to integrated fixing angle bar in the housing
- Calibrated and temperature-compensated measuring signal
- Excellent long-term response
- Supplied with connection set
- Very short reaction time
- *Display* indicates the present differential pressure

* Depending on type

Use

The differential pressure sensor acquires differential, over and under pressure of air and nonaggressive gases if a high degree of measuring accuracy and quality is required as well as a requirement for a calibration certificate.

Fields of application:
- Measuring slightest differential pressures in ventilation and air conditioning ducts
- Check air flows
- Monitor filters and control fans
- Pressure supervision in labs, production, storage and clean rooms
- For acquiring variable air flow in VAV plants on the supply and extract air side

Conversion

100 Pa = 1 hPa = 1 mbar

Ordering and delivery

When ordering a differential pressure sensor, please specify the quantity, type, and product name.

Example

<table>
<thead>
<tr>
<th>Type (ASN)</th>
<th>Product number (SSN)</th>
<th>Product designation</th>
</tr>
</thead>
<tbody>
<tr>
<td>QBM4000-1</td>
<td>S55720-S247</td>
<td>Differential pressure sensor with calibration certificate.</td>
</tr>
</tbody>
</table>

A round plug connector (Lumberg RKC 30/11) and a 2-meter PVC tube is included with the differential pressure sensor.
Additional accessories may be ordered separately.

Accessories

Additional sets of air duct probes are available depending on measuring requirements. Various mounting brackets are also available depending on installation location.

Mode of operation

The sensor acquires the differential pressure using a silicon rubber membrane and ceramic bar. The sensor generates as per the deflection, a linear and temperature-compensated output signal DC 0...10 V or 4...20 mA.
Design

The differential pressure sensors consist of:

- Sensor housing with fixing angle bar, 3-pin plug and hinged lid with sealed safety screw
- Pressure chamber with membrane and ceramic lever
- Circuit board
- LCD display for the digital display of the sensor signal in Pa (for QBM41…D only)

Display, setting, and connection elements

![Diagram of sensor housing with numbers 1, 2, 3, 4]

Key

1. 3-pin plug
2. Display window (on QBM4100-1D only) for the digital display of the sensor signal
3. Connection nipples (see "Mounting notes")
4. Sealed safety screw for hinged cover

Mounting and installation notes

The differential pressure sensor is suited for direct mounting on air ducts, walls, ceilings, or in control panels.

The sensor must be installed vertically.

The supplied 2 meter plastic tubing can be modified to the duct connection on the plant.

To achieve the housing protective class indicated under "Technical data", the differential pressure sensors must be mounted with the pressure nipple facing down. In addition, they should be higher than the air duct probes.

⚠ Caution

If the pressure connection nipples point upward or are at a lower level than the air duct probes, condensation can collect inside the sensor, causing damage to the device.

Note

The pressure tubing for the sensor nipples are connected as following to the differential pressure sensors:

<table>
<thead>
<tr>
<th>On the air duct side</th>
<th>On the pressure sensor side</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tubing with higher pressure side (lower vacuum)</td>
<td>Connect to pressure nipple &quot;P1&quot; or &quot;+&quot;.</td>
</tr>
<tr>
<td>Tubing with lower pressure side (higher vacuum)</td>
<td>Connect to pressure nipple &quot;P2&quot; or &quot;+&quot;.</td>
</tr>
</tbody>
</table>

The sensor is supplied with mounting instructions.
Refer to the Manual sensor installation from the BT download center for additional information.

⚠️ Caution
- Power supply by SELV or class 2 power supply with limited output of 15 W or less. (UL requirement)
- Use only copper wiring

### Commissioning notes

⚠️ Caution

Sensor calibration

The values indicated under "Technical data" apply only to vertically mounted differential pressure sensors (connection nipples pointing down).

The sensor is calibrated at the factor in the vertical position. As a consequence, the sensor must be **installed in the vertical position**. For **horizontal installation** (housing cover top or bottom), deviations occur to measured values that negate the measured values on the certificate.

### Disposal

The devices are considered electronics devices for disposal in terms of European Directive 2012/19/EU and may not be disposed of as domestic waste.

- Dispose of the device via the channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

### Specifications

#### QBM4100-1U

- Sum from zero point, linearity, reproducible and hysteresis.
- TC zero point: <±3 % FS (<±3 Pa)
- TC sensitivity: <±0.1 % FS/°C

**TC sensitivity**
- <±0.06 % FS/°C

#### QBM4000-1

- Zero point: <±1.0 % FS
- Sum from linearity, reproducible and hysteresis.
- TC zero point: <±2 % FS
- TC sensitivity: <±0.1 % FS/°C

**TC sensitivity**
- <±0.06 % FS/°C

#### QBM4000-3

- Zero point: <±0.7 % FS
- Sum from linearity, reproducible and hysteresis.
- TC zero point: <±1 % FS
- TC sensitivity: <±0.05 % FS/°C

**TC sensitivity**
- <±0.05 % FS/°C

#### QBM4000-10

- Sum from linearity, reproducible and hysteresis.
- TC zero point: <±1 % FS
- TC sensitivity: <±0.05 % FS/°C

**TC sensitivity**
- <±0.05 % FS/°C

#### QBM4000-25

- Sum from linearity, reproducible and hysteresis.
- TC zero point: <±0.7 % FS
- TC sensitivity: <±1 % FS

**TC sensitivity**
- <±0.05 % FS/°C

#### Long-term stability

- ±1.0% FS as per DIN IEC 60 770

#### Response time

- <20 ms

#### Load change

- <10 Hz

#### Tolerable overload on one side

- On P1: 5,000 Pa
- (10,000 Pa for types QBM4000-10, -25)
- At P2: 400 Pa

#### Rupture pressure

- at room temperature: 2 × overload
- at 70 °C: 1.5 × overload

#### Display (QBM4100-1D only)

- LCD, 2-line, 8 position each, alphanumeric, not backlit lit

#### Media

- Admissible medium temperature: 0...70 °C

#### Maintenance

- Maintenance free

#### Degree of protection

- Protection degree of housing at recommended installation: IP54 according to EN 60529
- Protection class: III according to EN 60730-1

#### Connections

- Electrical connections: 3-pin round plug with screw terminals 1.5 mm² (Lumberg RKC 30/11)
- Pressure connections: PVC nipples Ø 6.2 mm, under pressure side is designated as 'P2' or '-'

#### Environmental conditions

- Permissible ambient temperature
  - Operation: 0...70 °C
  - Transport and storage: -25...+70 °C
- Permissible ambient humidity: <90 % r.h. (without condensation)

#### Directives, standards

- Product standard: EN 61326-1
- Electrical equipment for measurement, control and laboratory use. EMC requirements.
- General requirements

- EU Conformity (CE)
  - CE1T1910xx_01 *)
- RCM Conformity
  - CE1T1910en_C1 *)

- UL 60730-1 / UL 60730-2-6
  - http://ul.com/database

#### Environmental compatibility

- The product environmental declaration CE1E1916*) contains data on environmentally compatible product design and assessments (RoHS compliance, materials composition, packaging, environmental benefit, disposal).

#### Dimensions (weight)

- Weight (with packaging): 0.250 kg (with round plug connector).
- Weight (with packaging), with display: 0.263 kg (with round plug connector).

*) The documents can be downloaded from http://siemens.com/bt/download.
