

Solutions for data centers

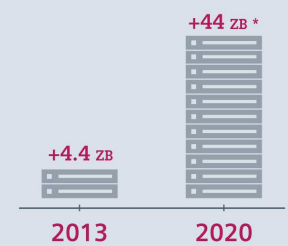

For the factories of the 21st century

Demand for data storage is increasing at an enormous pace.

In 2015,
205 bn
e-mails were sent every day.

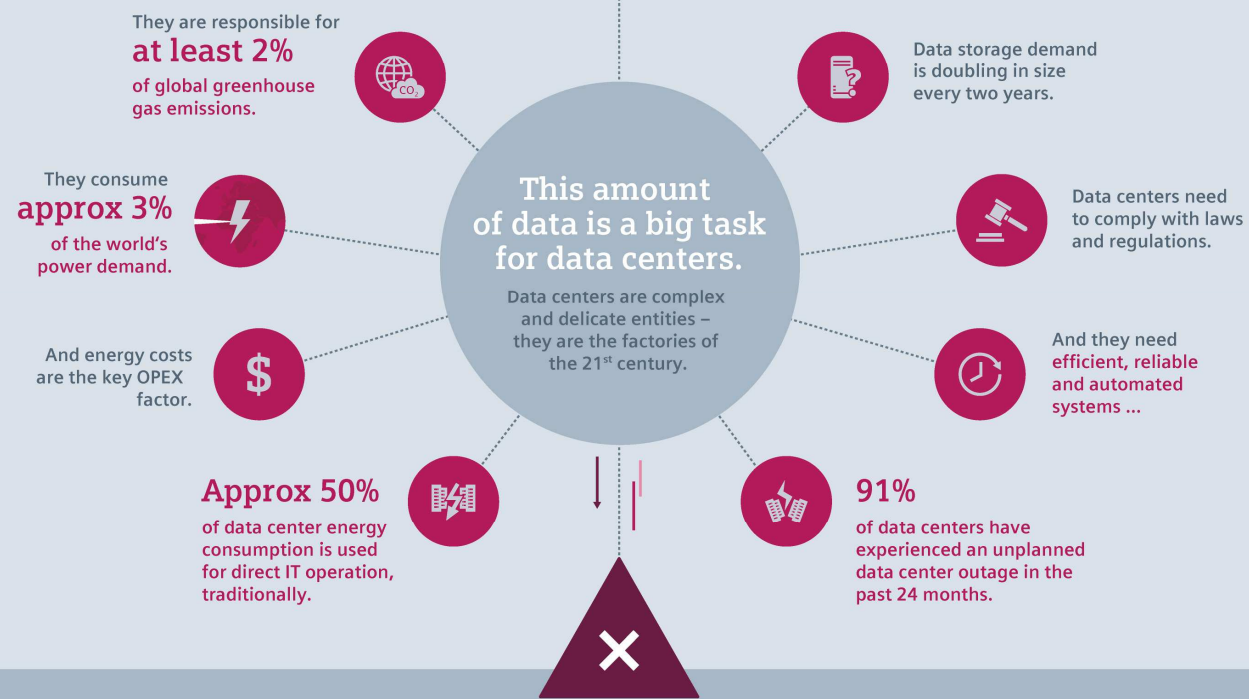

78
per active
Internet user

Created and stored information

That's enough to fill **57.5 bn iPads** of 32 GB.

*1 zettabyte = 1,125,899,906,842,620 MB

... to ensure safety, security and uptime.

Because **80%** of all data center downtimes are caused by human error.

Average costs of downtime per minute.
