

EnergyZone[®]

Helping Clients Make Important Decisions

The Energy Zone[®] energy management application provides organizations with the data, perspectives, and tools to build an energy program that minimizes a company's energy costs and risks.

Energy Zone[®] provides centralized energy intelligence, contract and invoice information, performance metrics associated with budget variances, and cost/consumption trends that can be used to identify areas of opportunity and risk.

Features & Benefits

Audit Quality Energy Data

Trust that energy data, reports, and metrics are accurate, tested, and held to the highest standards with SAS 70 Type II audit certified energy and data management processes.

Invoice Processing

Access invoice images, line-item details, and accounting reports efficiently over the internet. Global companies can view invoices in native currency and native language.

Contract Administration

Create efficiencies to reduce renewal risk and improve your capability to capture market opportunities by organizing and storing supply contracts on-line. Easily retrieve contract images, expiration, and notification details to support timely procurement activities.

Metrics & Benchmarking

Leverage on-line energy indexes and benchmarking tools to measure how efficiently energy cost, consumption, and production is managed. Quickly determine what energy initiatives are likely to deliver the highest value.

Energy Purchases

Evaluate the timing of energy procurements and monitor the supplier selection process through online review of supplier offers. Compare price structures and other important contract terms to minimize overall energy costs and risks.

Hedging Capabilities

Evaluate market drivers to identify attractive buying opportunities. Monitor all market positions as compared to important cost benchmarks such as budget targets.

Budget Performance

Report on budget development and daily variance through Energy Zone to manage cost commitments consistent with business expectations.

Savings Opportunities

Monitor program initiatives by category, status, and savings to effectively delegate initiatives based on cost avoidance, savings, or energy reduction. Combine this data with on-line metrics to provide justification for and validation of specific projects.

Reporting Capabilities

Use system-generated reports to communicate program goals, status, and value. Transparent reporting ensures that all stakeholders are informed and have a similar perspective to carry out energy decisions.

Information Accessibility

Create greater access to energy information through Energy Zone[®] and efficiently share information company-wide while promoting the energy initiatives that are important to established goals.
