Datacenter Clarity LC™

Datacenter Clarity LC™

- Problem 3
- Solution 4
- Best Practice 5

Problem at Hand

Today's Data Center Challenges

- Ensure Uptime
 - Real Time Monitoring
 - Predict Outages
- Improve Energy and Operation Efficiencies
 - Bottom Line
 - Green Initiatives
- Accommodate Rapid Change of Business Needs
 - Consolidation/Expansion in Less Time

Data Center Solutions A Broad Portfolio Beyond DCIM

Solution

- IT / Building / Security Asset Lifecycle Management
- Asset Visualization in HD4D
- Real Time Monitoring, Alarm, and Event Notification
- Capacity Planning and IT Optimization
- Workflow and Work Order Management
- CFD Modeling and Analysis for Optimum Energy Efficiency
- Linking of IT, Mechanical, and Electrical Assets
- Scalable and Multi-Site Support Platform
- Mobility Management Applications

Datacenter Clarity LC – DCIM powered by Siemens PLM Software

Best Practice

- Proven, Reliable Platform and Future Proof Architecture
- Financial Stability – Minimize Risk with Start-Ups
- Experience of Integrating Systems Beyond DCIM
- Local Service Support and ME&S Team – Response and Quality
- Proven Track Record – Products, LEED, Data Centers, Life Cycle
- Comply with or Exceed Most Specifications
- Data Center and Critical Environment Experience
- Local, National, Global Support
- Protection and Support
