

Supply and extract VAV with KNX PL-Link VAV controller, heating and cooling coil and hot water radiator on triac output

DXR2..18-102A

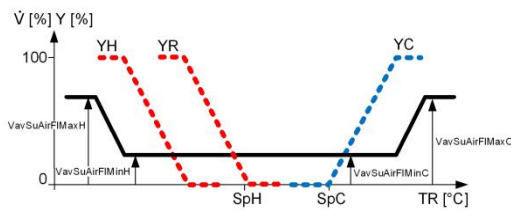

- Supply & extract air volume control with compact KNX PL-Link VAV controller
- Room temperature control
- Air quality control
- Heating with LTHW radiator on triac output
- Downdraft compensation
- Room temperature and rapid ventilation operation via KNX PL-Link room operator unit with temperature, air quality & relative humidity measurement

Description of functions

Basic functions

- PID control for supply VAV, temperature and air quality.
- The temperature and air quality (CO₂) is measured in the room operator unit.
- The application allows customers to adjust the room temperature setpoints and rapid ventilation via the room operator unit.
- Display of room air quality on room unit.
- The operating modes are Comfort, Pre-Comfort, Economy and Protection.
- The air flow for heating and cooling is operated in sequence to the valves. Parallel operation can be configured.
- Supply VAV actuator on KNX PL-Link.

Auxiliary functions

- Rapid ventilation.
- Air volume flow tracking for positive and negative room air pressure.
- Air supply functions to coordinate demand signals for pressure optimized fan control.
- Green Leaf (RoomOptiControl) function.
- Multisegment use of DXR2 automation stations with VAV application.
- The application allows for control via centralized commands (e.g. scheduler program for room operating mode).
- Central optimum start control provides best room comfort at the start of occupancy.
- Central operation or reset of setpoints, timed valve kick function or outside temperature dependent heating limit.
- Central override functions for valves.
- Seasonal compensation of room temperature setpoints.

Options

- Extract VAV actuator on KNX PL-Link.
- PID control for LTHW radiator heating.
- Heating and cooling coils with 3-position valves controlled by triac outputs.
- DOWNDRAFT compensation.
- Outside temperature (for downdraft compensation) distributed over BACnet.
- Optimal energy efficiency by including the option for room/supply air cascade control, presence detector or window contact.
- Optional system alarms displayed on the management station notify building operators of possible faults.
- Optional trends can be activated for room sensors.

Variants

- PWM constant (incl. spring return) or PWM thermal control can be selected for valves.
- Room operator unit and sensor variants:
 - KNX PL-Link wall-mount sensor
 - KNX PL-Link flush-mount room operator unit
 - KNX PL-Link flush-mount sensors
 - Analog extract air temperature sensor
- Presence can be detected by KNX PL-Link sensor or binary sensor.

Siemens devices	Legend	Type of unit	Data sheet	Product No.	Qty.

Default values

	Parameter	Values/Range	Basic setting
Temperature setpoints	Cooling setpoint for Comfort	0 ... 50 °C	24 °C
	Delta cooling setpoint for Pre-comfort	0 ... 10 K	1 K
	Cooling setpoint for Economy	0 ... 50 °C	35 °C
	Cooling setpoint for Protection	0 ... 50 °C	40 °C
	Heating setpoint for Comfort	0 ... 50 °C	21 °C
	Delta heating setpoint for Pre-comfort	0 ... 10 K	1 K
	Heating setpoint for Economy	0 ... 50 °C	15 °C
	Heating setpoint for Protection	0 ... 50 °C	12 °C
Ventilation Control	Setpoint room air quality for comfort	0 ... 2000 ppm	900 ppm
	Setp. room air quality for pre-comfort	0 ... 2000 ppm	1100 ppm
	Setpoint room air quality for economy	0 ... 2000 ppm	1500 ppm
	Setpoint room air quality for protection	0 ... 2000 ppm	1500 ppm
Supply air VAV	Supply air VAV max.air vol.flow f.cool	0 ... 10'000 m ³ /h	100 m ³ /h
	Supply air VAV min.air vol.flow f.cool	0 ... 10'000 m ³ /h	50 m ³ /h
	Supply air VAV max.air vol.flow f.heat	0 ... 10'000 m ³ /h	100 m ³ /h
	Supply air VAV min.air vol.flow f.heat	0 ... 10'000 m ³ /h	50 m ³ /h
	Supply air VAV min.air vol.flow f.vent.	0 ... 10'000 m ³ /h	0 m ³ /h
Room operator unit	Room unit, display temperature	None Display room temperature	Display room temperature
	Room unit, display windows status	Yes, No	No
	Room unit, display air quality	None Display room air quality	Display room air quality
	Room unit, air quality display	Numeric (in ppm) Symbolic (with the symbols +, ++, and +++) Textual (Poor, Ok, Good)	Textual
	Room unit, display heat./cool. status	Yes, No	Yes
	Enable operation: room temp. setpoint	Yes, No	Yes
	Room unit, room temp. setpoint display	Absolute temperature setpoint Relative setpoint shift	Relative setpoint shift
	Enable operation: fan speed setpoint	Yes, No	Yes
	Enable operation: presence button	Yes, No	No
	Enable operation: temporary Comfort	Yes, No	No
	Enable operation: room op. mode	Yes, No	No
	Enable operation: Green Leaf	Yes, No	Yes

Supply and extract VAV with KNX PL-Link VAV controller, heating and cooling coil and hot water radiator on triac output

DXR2..18-102A

Engineering

- ABT Site engineering tool is required to configure the DXR2 automation stations.
- See the Siemens Download Center at www.siemens.com/bt/download for the latest application configuration and workflow tutorials.
- Option combination according to available on-board I/Os on controller.
- B1 (optional extract air temperature sensor) must be configured under 'Room temperature' in order to serve for room temperature control.
- D2_a (on-board presence detector) to be configured in ABT Site under 'Presence detector 2' for maximum combination of optional devices.
Type of operation (NO or NC). Multiple devices of the same type can be connected.
- All DXR2 can control two radiator device and two radiant ceilings. This configuration can control only one radiator device and one radiant ceiling device because of the limited I/O mix of the selected controller.

Management station

Sample presentation of a VAV application on the Desigo CC management station.
