# Keeping data safe is vital

If your heart was at risk, you would do anything to protect it. Why do less for the heart of your business: your data? Whether your company is small or large, it's your data that keeps it alive. Do you have the right protection concept to keep it safe? And not just from virtual threats, but also from dangers like fire and the impact of sound and water on your hard disk drives and electronics?

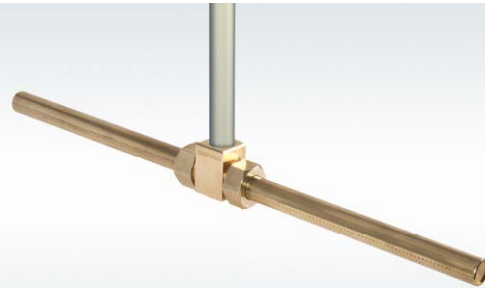

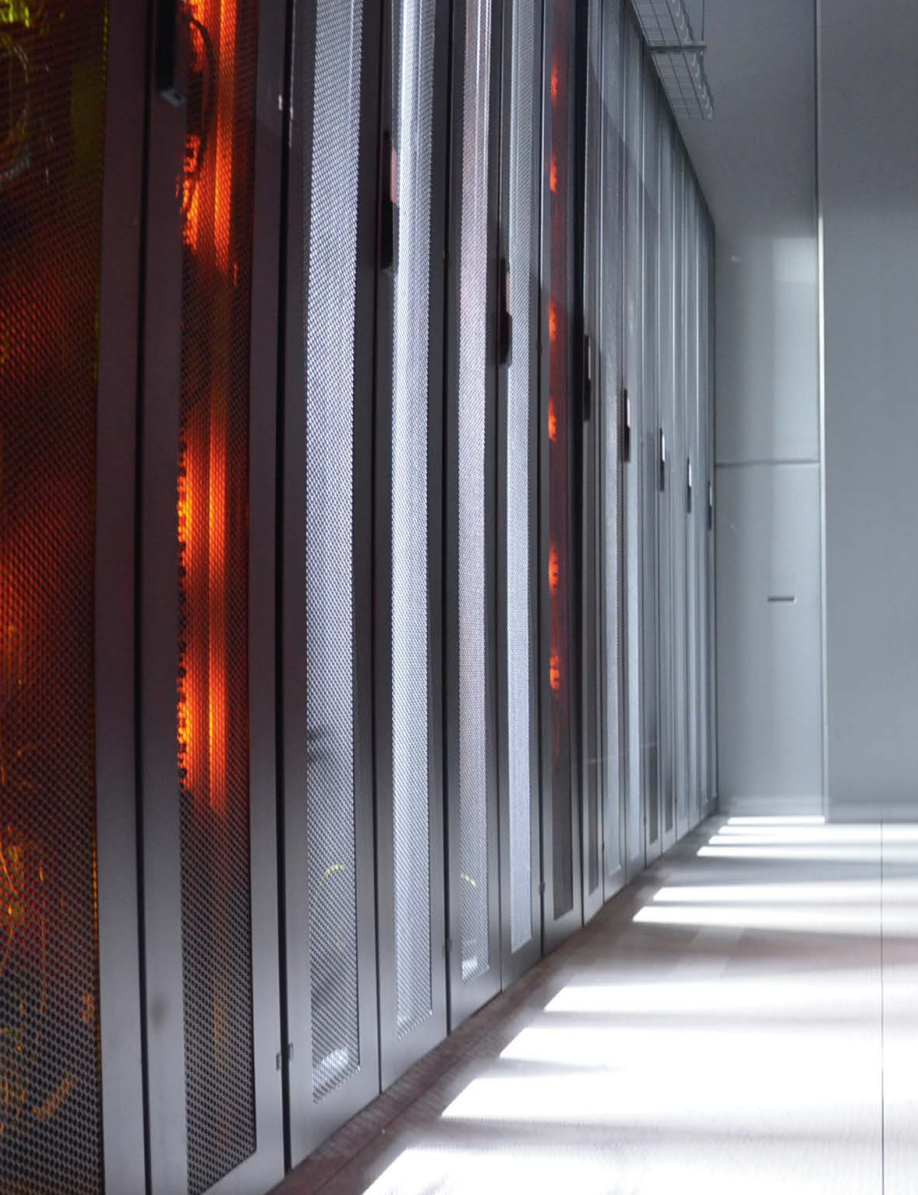

Safeguard your data from fire, sound and water.

## Benefits

- › Ensured business continuity
- › Safety for people, data and the environment
- › Investment protection
- › Efficient cost of ownership
