

Duct air quality sensors **QPM11x4**

- Maintenance-free CO₂ sensing element based on optical infrared absorption measurement (NDIR = non dispersive infrared)
- No recalibrations required

Use

In air ducts of ventilation and air conditioning plant to enhance room comfort and to optimize energy consumption by providing demand-controlled ventilation. The sensor acquires CO₂ concentrations and temperature.

Important!

The sensors may not be deployed as safety devices, e.g. as gas or smoke warning devices!

Type summary

Type	Order number	Designation
QPM1104	S55720-S455	Duct sensor CO ₂
QPM1164	S55720-S456	Duct sensor CO ₂ /T

The sensor is supplied complete with mounting flange and cable entry gland M16.

Engineering notes

The sensor must be powered by a transformer for safety extra low-voltage (SELV) with separate windings, suited for 100 % duty.

Cable routing and cable selection

On applications with EMC problems, use shielded cables. For secondary power lines and signal lines, use twisted-pair cables.

Mounting notes

Mounting location and orientation

To ensure degree of protection IP54, the sensor must be fitted with the cable entry pointing downward.

⚠ Caution

- If used in connection with steam humidifiers, the distance to the humidifier must be a minimum of 3 m. If permitted by the installation, the distance should be as great as possible, but no more than 10 m
- The sensing elements in the immersion rod are susceptible to impact and shock. Any impact or shock should therefore be avoided.

Mounting instructions

Mounting instructions are enclosed in the package.

Disposal

The device is considered an electronics device for disposal in terms of European Directive 2012/19/EU and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.
