

# SIEMENS

*Ingenuity for life*

## It's time to upgrade your Insight software to Desigo CC™

Building technology is advancing rapidly. Make sure your building automation system software is keeping pace.

The world is changing fast, and keeping your building systems up to date is more important than ever. Insight software has been effectively managing buildings for more than 20 years. Yet since its introduction, the world that our buildings exist in—and what we expect from our building automation systems—have changed dramatically.

Stay ahead of the changes. Upgrade to Desigo CC.

**Upgrading to Desigo CC will enable you to:**

- Manage rapidly changing IT standards
- Protect your systems from complex cybersecurity threats
- Tap powerful cloud computing technologies
- Store large quantities of building data for analysis
- Use advanced visualization tools
- See info on-the-go with mobile applications
- Offer data access to external stakeholders
- Leverage data from multiple building systems

Of course, you can't continuously replace your building systems to keep up with the changing environment. You depend on your system providers to offer new technologies and migration paths to keep your systems up to date.

Desigo CC is the answer for your APOGEE® Automation System, and making the move from Insight to Desigo CC is easier than you may think.

# Desigo CC brings your existing APOGEE System into the digital age with a modern integration platform ready to meet your changing needs.

## Open Development Platform

Extend the functionality of your system and freely exchange your valuable data with external applications

## Latest IT Standards

Support for newest operating systems, current IT environments, latest UI trends

## Mobile Accessibility

Enables operators on-the-go to monitor and control facilities remotely

## Cyber Safety Monitoring

Continuously monitored and updated to address cyber security threats and tested on current virus protection software

## Multi-Discipline

Monitor all of your building systems from a common interface, and make your fully integrated facility into a truly smart building

## Cloud Ready

Modern web service interfaces let your building system take part in the Internet of Things (IoT)

## KPI Dashboard

Customized views enable smarter, more efficient control strategies

## Backward Compatible

The full range of field panel controllers are supported continuing the strong legacy of backwards compatibility and investment protection provided by the APOGEE System

## Desigo CC offers total system visualization:

Automation

Lighting

Shading

Fire

Security

Video

Energy Management

Mechanical Systems

Industrial Systems

**Take the next steps today!** Let our systems integration expertise help you chart your migration path before Insight reaches its end of life. We can design customized migration plans that will best meet your building's unique requirements. Contact your Siemens Sales Representative to get started.
