

# Novigo Public Address and Controlled Evacuation

The sound of safety

## One solution to cover all your PA/VA needs

In commercial and public buildings, life safety must always be the highest priority. Moving people out of harm's way in case of an emergency is largely a matter of communication, with vocal instructions being far more effective than mere visual and sound alarms. This is why public address and voice alarm (PA/VA) systems in these buildings aren't just a useful tool for announcements, entertainment or live moderation but an integral part of the safety infrastructure.

With Novigo, you can cover all your PA/VA needs with a single solution. It was designed with the specific convenience and emergency applications in modern businesses and organizations in mind, including sophisticated emergency procedures such as guided bulk, zone and phased evacuation, supported by live announcements by the fire brigade. Thanks to its state-of-the-art modular and scalable system architecture, Novigo can be customized for buildings of all types and sizes.

### Product highlights

- State-of-the-art technology meeting and exceeding EN 54-16 standards
- Multi-redundancy up to complete double structure for outstanding reliability
- No system restarts required for configuration – maximum business continuity
- Pro Sound for optimum intelligibility and comfortable ambience
- Addressable end-of-line modules enable step-by-step modernization
- Failsafe loop isolators thanks to omission of error-prone capacitors

Ensuring safety and comfort of employees, visitors and guests in...

Airports

Shopping centers

Hotels

Office buildings

Restaurants

Industrial facilities

Concert arenas

## Your benefits with Novigo

### Real-time engineering & remote access

Configure and maintain your PA/VA system remotely and in real-time without having to reboot it in the process with the Novigo configuration software (PACE-Design) and mobile application.

### Multi-redundancy

Achieve failure safety levels far exceeding EN 54-16 standards with multiple redundancy levels, from individual backup components up to a complete double structure.

### Pro Sound quality and low latency

Effectively address your employees, visitors and guests with crystal-clear, low-latency voice announcements and high-quality ambient music.

### Modernization with addressable EOL modules

Conveniently implement Novigo step-by-step while keeping legacy speaker line structures with smart end-of-line (EOL) modules that identify any faults.

### Flexible speaker line design

Use Novigo in combination with different kinds of speaker line topologies including stub (B- & A/B-wiring), tree and loop.

Modern technology combined with the unmatched experience and support of a global leader in safety systems:

Novigo is public address and voice alarming at its best – and a worthwhile investment in the future of your business.
