

Generator Ready Load Center

Features:

- Indoor, 30 circuit, 42 space
- 200A main breaker option
- Field addable main breaker (150-225A) to main lug option
- 42 utility power circuits, 18 critical circuits backed up by generator
- Field addable automatic transfer switch (shown) or mechanical interlock kit
- Minimal expense over a standard load center
- Greatly reduces installation cost down the road when a standby generator is installed

Description	Catalog Number
