Water, air, gas and steam monitoring

The advanced data recorder comes with digital inputs which can be configured for pulse counting applications where full utility monitoring is required.

Now gas, water, air and steam pulses can be collected in one unit logged and displayed. Up to 16 digital inputs can be added.

E-Mail capable

The advanced data recorder provides multiple communication interfaces, including serial, modem and Ethernet. With an Ethernet network card install, the 9510-RTU can send logged data via e-mail for storage and reporting on a remote PC.
