Versions				
<ul style="list-style-type: none"> With screw terminal on both sides 		8WA1 501	041	10
Note				
Through-type terminals with sectionalizing feature are used for convenient isolation of the current path without disconnection of conductors. It is possible using the sockets of the connection screws to e.g. measure the loop resistance or to connect an ammeter into the circuit. When using connection combs, the connectable cross-section is reduced by one stage.
