In today’s electronic world, home and business electrical systems aren’t complete unless they incorporate surge protection. This is best accomplished by Stopping Surges Before They Get In through the application of hard-wired surge protective devices (SPDs) at key surge entry paths located within an electrical system.

Locating SPD installation points is a relatively easy step in developing a surge protection plan. Selecting and sizing surge protective devices is not as simple, but Siemens has solutions for virtually all applications.

Even at their inception over 18 years ago, our Transient Protection System (TPS) family of surge protectors included a number of industry SPD safety control firsts including the patented Ceramgard and TranSafe circuitry, coordinated fusing and thermal cutouts, dielectric isolation, mechanical reinforcing taping resulting in a design that ensured the highest possible electrical system protection and reliability.

Our next generation UL 1449 4th Edition TPS3 SPDs carry on this same legacy by maintaining the highest degree of safety while delivering the industry’s best performance ratings – lowest Voltage Protection Ratings (VPRs), Type 1 and 20 kA I nominal ratings nearly across the board, and surge current ratings from 50 kA to 1000 kA. This safety and performance “know-how” is infused within every Siemens TPS.

Electrical disturbances will always occur, but they don’t have to cause surge protectors to fail in an unsafe manner. Safer surge protection means uncompromised electrical system protection, safety, and reliability.

Type 1 Surge Protective Device ( SPD)
Mounts External to Electrical Distribution Equipment

Features:
- UL 1449 4th Edition Listed Type 1, CSA 22.2 No. 269.1
- Type 1 SPD
- Mounts external to electrical distribution equipment
  - Recommended for Line Side or Load Side Applications
- Bracket included for multiple mounting options
- Large-block 34 mm square MOVs
- 20 kA I (most models)
- 200 kA SCCR (most models)
- All UL required OCP & safety coordination included
- Type 1 SPDs intended for Line or Load side of Main Disconnect
- UL96A Lightning Protection Master Label compliant (@20kA I.)
- Designed, manufactured and tested consistent with:
  - NEC Article 285
  - IEC 61643, CE
  - 5 year warranty

- 100% monitoring
  (Every MOV is monitored)
- Individually fused and thermally protected MOVs
- Solid state bi-directional operation
- Repetitive impulse: 5000 - 3kA - 8 x 20µs; 1000 - 10kA - 8 x 20µs
- Less than 1 nanosecond response time
- Relative humidity range: 0-95% non-condensing
- Operating frequency: 47-63 Hz
- Peak Operating temperature: +85°C (185°F)
- Operating temperature: -40°C (-40°F) to +60°C (140°F)

Standard Configuration
- Standard NEMA 4X polycarbonate enclosure (UL 746C (I1), UL 94-5VA)
- Wire size: Prewired with 3’ (91.4 cm) of #10 AWG
- Standard size: 3.25” x 3.25” x 3.3” (82.6 mm x 82.6 mm x 83.8 mm)
- Standard weight: 2 lb. (0.9 kg)

SPD Monitoring
- LED indicators

Options
- N-G protection
- Dry Contact & Audible Alarm (Dry Contact connection leads exit through nipple via #18 AWG)

TPS3 03 DC is available in 300VDC, 600VDC and 1000VDC versions, which are designed to protect photovoltaic electrical systems. Typical PV installation would be on the DC solar panel side and also on the AC side of the inverter/converter. AC voltage TPS3 03’s are also available. SPDs are highly recommended when lightning activity is present to protect sensitive electrical photovoltaic components.

TPS3 03 DC is designed as a stand alone device in a NEMA 4X polycarbonate enclosure. Large block, thermally protected 50 kA MOVs are utilized. A green LED illuminates for diagnostic monitoring. TPS3 03 DC comes standard with a Tri-Mount installation kit which allows it to be Nipple, DIN-rail or Bracket mounted.

Voltage Code Surge Current (kA) Options

A = 120/240V, 1Ø, 3W (Fig 1) 10 = 100 kA per phase
B = 120/240V, 3Ø, 4W (Fig 3) 15 = 150 kA per phase
C = 120/208V, 3Ø, 4W (Fig 2) 20 = 200 kA per phase
D = 240V, 3Ø, 3W (Fig 4) 0 = Type 1 SPD
E = 277/480V, 3Ø, 4W (Fig 2) 2 = Type 2 SPD (Default)
Includes UL 1283
F = 480V, 3Ø, 3W (Fig 4) EMI/RFI Filters
G = 600V, 3Ø, 3W (Fig 4) 0 = Type 1 SPD
K = 380/220V, 3Ø, 4W (Fig 2) D = Dry contact
L = 600/347V, 3Ø, 4W (Fig 2) & audible alarm
S = 400/230V, 3Ø, 4W (Fig 2)

Example: TPS3C1110D2 = Type 2 SPD (Default) for a 208/120V application with a surge current capacity of 100 kA per phase, in a standard NEMA 4X enclosure with dry contacts and audible alarm option

When option 'D' is NOT selected, include a zero (0) in the field.

Type 1 / Type 2
Surge Protective Device (SPD) For Line Side or Load Side Applications

Features:
- UL 1449-4 Type 2 SPD, UL 1283 Listed, CSA 22.2 No. 269.2
- Optional UL 1449 4th Edition Listed
  Type 1, CSA 22.2 No. 269.1
- Type 1 / Type 2 SPD
- Mounts external to electrical distribution equipment
  • Recommended for line side or load side applications
- Large block, individually fused, thermally protected, 50 kA MOVs
- 20 kA In (most models)
- 200 kA SCCR (most models)
- Provides redundant replaceable module protection for low to high exposure applications
- All UL required OCP & safety coordination included
  • Type 1 SPDs intended for Line or Load side of Main Disconnect
  • Type 2 SPDs intended for Load side of Main Disconnect
- UL96A Lightning Protection Master Label compliant (@20kA In)
- Designed, manufactured and tested consistent with:
  • 1992/2000 NEMA LS-1
  • NEC Article 285
  • IEC 61643, CE
- 10 year warranty
- SPD Specifications
  • Surge Current Rating Per Phase

Available Accessories:
Ordered Separately
RMSIE - Remote monitor

Notes:
- For line side mounting in SWBD/SWGR
- Available in G voltage code only
- Available in 600 kA & 800 kA only
- Available in 400 kA & 500 kA only
Type 1 / Type 2
Surge Protective Device (SPD) For Line Side or Load Side Applications

Features:
- UL 1449-4 Type 2 SPD, UL 1283 Listed, CSA 22.2 No. 269.2
- Optional UL 1449 4th Edition Listed Type 1, CSA 22.2 No. 269.1
- Type 1 / Type 2 SPD
- Mounts external to electrical distribution equipment
- Recommended for line side or load side applications
- When “P” option is selected, TPS3 15, Type 1 SPD mounts internal to: SB1, SB3 and Type RCS switchboards, Type WL low voltage switchgear and TIASTAR motor control centers
- Large block, individually fused, thermally protected, 50 kA MOVs
- 20 kA I₃ (most models)
- 200 kA SCCR (most models)
- Single TPS6 style replaceable modules
- Provides redundant replaceable module protection for medium to high exposure applications
- Internal rotary disconnect switch included
- All UL required OCP & safety coordination included
- Type 1 SPDs intended for Line or Load side of Main Disconnect
- Type 2 SPDs intended for Load side of Main Disconnect
- UL96A Lightning Protection Master Label compliant (@20kA I₃)
- Designed, manufactured and tested consistent with:
  - NEC Article 285
  - IEC 61643, CE
  - 10 year warranty

- SPD Specifications
  - Surge Current Rating Per Phase
    | Per Phase | L-N | L-G | L-L | N-G |
    |-----------|-----|-----|-----|-----|
    | 600 kA    | 200 kA | 200 kA | 200 kA |
    | 900 kA    | 300 kA | 300 kA | 300 kA |

- 100% monitoring (Every MOV is monitored, incl. N-G)
- Individually fused and thermally protected MOVs
- Solid state bi-directional operation
- EMI/RFI filtering: Active tracking up to -50 db from 10 kHz to 100 MHz (Type 2 option only, includes UL 1283 Listing)
- Repetitive impulse: 5,000 hits
- Less than 1 nanosecond response time
- Relative humidity range: 0 - 95% non-condensing
- Operating frequency: 47-63 Hz
- Operating temperature: -25°C (-15°F) to +60°C (140°F)
• Standard Configuration
  • Standard NEMA 1/12/3/4 ANSI 61 steel enclosure
  • Internal rotary disconnect switch
  • Wire size: #8 AWG to 1/0
  • Standard size: 20" x 20" x 7" (508 mm x 508 mm x 178 mm) *
  • Standard weight: 64 lb. (29 kg) *

*Other NEMA ratings may increase enclosure size and weight

• SPD Monitoring
  • LED indicators
  • Audible alarm with silence switch and test button
  • Dry contacts
  • Surge counter

Ordering Information

TPS3 L15 X2

Voltage Code Surge Current (kA) Enclosure Options

A = 120/240V, 1Ø, 3W (Fig 1) 60 = 600 kA per phase
B = 120/240V, 3Ø, 4W (Fig 3) 90 = 900 kA per phase
C = 120/208V, 3Ø, 4W (Fig 2)
E = 277/480V, 3Ø, 4W (Fig 2)
K = 380/220V, 3Ø, 4W (Fig 2)
S = 400/230V, 3Ø, 4W (Fig 2)

Example: TPS3CL15600X02 = 10 Mode, Type 2 SPD (Default) for a 208/120V application with a surge current capacity of 600 kA per phase, in a standard NEMA 1/12/3R/4 enclosure with a surge counter

When an option is not selected, include a zero (0) in the field

Type 1 / 2 Surge Protection Device ( SPD) for P1, P2 Lighting Panelboards and P3 Power Distribution Panelboards, Motor Control Centers and Busway Systems

Features:
- Mounts internal to:
  - P1, P2 and P3 panels
  - TIASTAR motor control centers - standard 6" bucket
  - STP series busplug on SX series busway
  - Consult factory for field retrofit in P1 panels
- UL 1449-4 Type 2 SPD, UL 1283 Listed, CSA 22.2 No. 269.2
- Optional UL 1449 4th Edition Recognized Type 1, CSA 22.2 No. 269.1
- Type 1 / Type 2 SPD
- Large block, individually fused, thermally protected, 50 kA MOVs
- 20 kA Iₜ (most models)
- 200 kA SCCR (most models)
- Direct bus connected or can be wired to a circuit breaker (include W option)
- UL96A Lightning Protection Master Label compliant (@20kA Iₜ)
- All UL required OCP & safety coordination included
- Type 1 SPDs intended for Line or Load side of Main Disconnect
- Type 2 SPDs intended for Load side of Main Disconnect
- Designed, manufactured and tested consistent with:
  - NEC Article 285
  - IEC 61643, CE

Type 1 / 2 Surge Protection Device (SPD) for Revised P1 Lighting Panelboards

**Features:**
- Mounts internal to:
  - Revised P1 Lighting Panelboards
- Consult factory for field retrofit in Revised P1 Lighting Panelboards
- UL 1449-4 Type 2 SPD, UL 1283 Listed, CSA 22.2 No. 269.2
- Optional UL 1449 4th Edition Recognized Type 1, CSA 22.2 No. 269.1
- Type 1 / Type 2 SPD
- Large block, individually fused, thermally protected, 50 kA MOVs
- 20 kA Iₙ (most models)
- 200 kA SCCR (most models)
- Direct bus connected
- Can be wired to a circuit breaker (consult factory at time of order or see installation manual for retrofit)
- UL96A Lightning Protection Master Label compliant (@20kA Iₙ)
- All UL required OCP & safety coordination included
- Type 1 SPDs intended for Line or Load side of Main Disconnect
- Type 2 SPDs intended for Load side of Main Disconnect
- Designed, manufactured and tested consistent with:
  - NEC Article 285
  - IEC 61643, CE
  - 10 year warranty
- Repetitive impulse: 5,000 hits
- Less than ½ nanosecond response time
- Relative humidity range: 1-95% non-condensing
- Operating frequency: 47-63 Hz
- Operating temperature: -25°C (-15°F) to +60°C (140°F)

**SPD Specifications**
- Surge Current Rating Per Phase
  - L-N: 150 kA, 300 kA
  - L-G: 50 kA, 100 kA
  - L-L: 50 kA, 100 kA
  - N-G: 50 kA, 100 kA
- 100% monitoring (Every MOV is monitored, incl. N-G)
- EMI/RFI filtering: Active tracking up to -50 db from 10 kHz to 100 MHz (Type 2 option only, includes UL 1283 Listing)
• Applications
  • Provides main service or downstream protection for sensitive computer and electronic loads
  • Standard redundancy use: 150 kA per phase
  • Maximum redundancy use: 300 kA per phase

• Standard Monitoring
  • LED indicators
  • Audible alarm with silence switch and test button
  • Dry contacts
  • Surge counter

Type 1 / 2 Surge Protection Device ( SPD )

Features:
- Mounts internal to:
  - SB1, SB2, SB3 & Type RCS switchboards
  - Type WL low voltage switchgear
  - TIASTAR motor control centers - standard 12" bucket
  - STP series busplug on SX series busway
- UL 1449-4 Type 2 SPD, UL 1283 Listed, CSA 22.2 No. 269.1
- Optional UL 1449 4th Edition Recognized Type 1, CSA 22.2 No. 269.1
- Type 1 / Type 2 SPD
- Large block, individually fused, thermally protected, 50 kA MOVs
- 20 kA I (most models)
- 200 kA SCCR (most models)
- Rotary disconnect switch included
- All UL required OCP & safety coordination included
- Type 1 SPDs intended for Line or Load side of Main Disconnect
- Type 2 SPDs intended for Load side of Main Disconnect

UL96A Lightning Protection Master Label compliant (@20kA I )
- Designed, manufactured and tested consistent with:
    C62.62-2010, C62.72-2007 & CSA C22.2 No. 269.1 and .2
  - NEC Article 285
  - IEC 61643, CE
- 10 year warranty

- EMI/RFI filtering: Active tracking up to -50 db from 10 kHz to 100 MHz
  (Type 2 option only, includes UL 1283 Listing)
- Repetitive impulse: 5,000 hits
- Less than ½ nanosecond response time
- Relative humidity range: 1-95% non-condensing
- Operating frequency: 47-63 Hz
- Operating temperature:
  - -25°C (-15°F) to +60°C (140°F)
• Applications
  - Provides main service entrance or downstream protection for sensitive computer and electronic loads
  - Std. redundancy use: 300kA/phase
  - Inc. redundancy use: 450kA/phase
  - Max. redundancy use: 500kA/phase

• SPD Monitoring
  - LED indicators
  - Audible alarm with silence switch and test button
  - Dry contacts
  - Surge counter
  - Rotary disconnect switch

TPS3 06 X 2

Voltage Code  Surge Current (kA)  Options

A = 120/240V, 1Ø, 3W (Fig 1)  10 = 100 kA per phase
B = 120/240V, 3Ø, 4W (Fig 3)  15 = 150 kA per phase
C = 120/208V, 3Ø, 4W (Fig 2)  20 = 200 kA per phase
D = 240V, 3Ø, 3W (Fig 4)  25 = 250 kA per phase
E = 277/480V, 3Ø, 4W (Fig 2)  30 = 300 kA per phase
F = 480V, 3Ø, 3W (Fig 4)  40 = 400 kA per phase
G = 600V, 3Ø, 3W (Fig 4)  50 = 500 kA per phase
K = 380/220V, 3Ø, 4W (Fig 2)  X = Surge counter (Standard)
L = 600/347V, 3Ø, 4W (Fig 2)
S = 400/230V, 3Ø, 4W (Fig 2)

Example: TPS3C0640X002 = Type 2 SPD (Default) for a 208/120V switchboard with a surge current capacity of 400 kA per phase and a surge counter

When an option is not selected, include a zero (0) in the field

Available Accessories:
Ordered Separately
RMSIE - Remote monitor
WHXWDP120 = 10' Display cable extension

UL 1449 Fourth Edition - Test Data

Type 1 / 2 Surge Protection Device ( SPD) for Service Entrance Applications – SB1, SB2, SB3, Type RCS Switchboards, Type WL Low Voltage Switchgear, Motor Control Centers and Busway Systems

Features:

- Mounts internal to:
  - SB1, SB2, SB3 & Type RCS switchboards
  - Type WL low voltage switchgear
  - TIASTAR motor control centers - standard 12” bucket
  - STP series busplug on SX series busway
- UL 1449-4 Type 2 SPD, UL 1283 Listed, CSA 22.2 No. 269.2
- Optional UL 1449 4th Edition Listed Type 1, CSA 22.2 No. 269.1
- Type 1 / Type 2 SPD
- Large block, individually fused, thermally protected, 50 kA MOVs
- 20 kA Iₚₜ, (most models)
- 200 kA SCCR (most models)
- Rotary disconnect switch included
- All UL required OCP & safety coordination included
- Type 1 SPDs intended for Line or Load side of Main Disconnect
- Type 2 SPDs intended for Load side of Main Disconnect
- TPS3 L6
- Designed, manufactured and tested consistent with:
  - NEC Article 285
  - IEC 61643, CE
  - 10 year warranty

- SPD Specifications
  - Directly connected discrete protection elements between all possible modes providing true 10 mode protection
  - Surge Current Rating Per Phase
    | Per Phase | L-N | L-G | L-L | N-G |
    |-----------|-----|-----|-----|-----|
    | 150 kA    | 50 kA | 50 kA | 50 kA | 50 kA |
    | 300 kA    | 100 kA | 100 kA | 100 kA | 100 kA |
    | 450 kA    | 150 kA | 150 kA | 150 kA | 150 kA |
  - 100% monitoring (Every MOV is monitored, incl. N-G)
  - EMI/RFI filtering: Active tracking up to -50 db from 10 kHz to 100 MHz (Type 2 option only, includes UL 1283 Listing)
  - Repetitive impulse: 5,000 hits
  - Less than ½ nanosecond response time
  - Relative humidity range: 1-95% non-condensing
  - Operating frequency: 47-63 Hz
  - Operating temperature: -25°C (-15°F) to +60°C (140°F)

- TPS3 L6
- True 10 Mode Protection

- TPS3 L6
- True 10 Mode Protection
• Applications
  • Provides main service entrance or downstream protection for sensitive computer and electronic loads
  • Std. redundancy use: 300kA/phase
  • Max. redundancy use: 450kA/phase

• SPD Monitoring
  • LED indicators
  • Audible alarm with silence switch and test button
  • Dry contacts
  • Surge counter
  • Rotary disconnect switch

Frequently Asked Questions

What is a Surge Protective Device or SPD?

A Surge Protective Device is a device that attenuates (reduces in magnitude) random, high energy, short duration overvoltages caused by lightning, utilities, switching, etc. Such anomalies occur in the form of voltage and current spikes with a duration of less than half an AC voltage cycle. These high energy power spikes can damage sensitive electronic equipment, such as computers, instrumentation, and process controllers.

How do SPDs work?

Surge Suppressors divert high energy power away from a load by providing a lower impedance path to common point earth ground. This is similar in concept to pressure relief valves that protect water heaters from overpressure. Surge suppressors used most often for protection of AC Power have metal oxide varistors (MOVs) connected in parallel.

Where are SPDs installed?

AC voltage surge suppressors are typically installed in these three areas: at a utility service entrance for protection of an entire facility, in distribution panelboards and switchboards for protection of sensitive downstream loads; connected to a wall outlet for individual protection of a specific piece of equipment, such as a computer or solid-state controller.

What is Clamping Voltage?

Clamping voltage, also referred to as peak let through or suppressed voltage rating, is the amount of voltage a surge suppressor permits to pass through it to the attached load during a transient event. Clamping voltage is a performance measurement of a surge suppressor’s ability to attenuate a transient. For example, a surge suppressor might limit a 6,000V surge so that only 700V is ‘visible’ to the load. The Voltage Protection Rating is 700V, commonly called Clamping Voltage. This performance value is confirmed by Underwriters Laboratories during tests conducted while evaluating a surge suppressor for listing.

What is Surge Current Capacity?

Surge current capacity is the maximum amount of surge current that a surge suppressor can pass for a single transient event. This level is used to indicate the protection capacity of a particular surge suppressor design, and when specifying surge suppressors. For example, in a high exposure application with very large transients present from lightning, a higher level surge current capacity might be desired. Be aware that surges have natural limitations and that larger surge current capacity tends to add redundancy rather than the implied ability to handle an extremely large surge. For example, an entire lightning strike cannot go through wire; it is much like trying to put the output from a fire hose through a soda straw. Consequently, suppressors do not need to be sized for entire lightning strikes. There are valid reasons for adding excess surge current capacity for redundancy reasons.

What types of components make up a SPD?

The device most commonly used in AC voltage surge suppressors are MOVs, a solid-state device made of zinc oxide materials.

MOVs are voltage sensitive semiconductors, which change from high impedance to low impedance when sensing an overvoltage condition. MOVs are packaged for specific voltages and current handling capacities.

Other devices (more typically found in DC applications) include single junction diodes and gas tubes that ionize at preset voltages.

What features should be considered When selecting SPDs?

Two important areas to consider during the selection of a surge suppressor are performance and safety, and include the following criteria:

Performance: 1) surge current capacity; and 2) clamping voltage.

Safety: 1) the individual suppression circuit should be fused to clear an inoperative MOV during an extreme transient event, and 2) provide overcurrent protection for the surge suppressor during a fault condition.

What Surge Current Capacity is required?

Surge current capacity is dependent on the application and the amount of required protection. The selection of the proper surge suppressor is not an exact science and cannot be scientifically calculated from a standard algorithm.

Questions to consider when specifying the proper surge current capacity for a surge suppressor include:

- What is the geographic location of the facility and it’s susceptibility to lightning? (For example, Florida is a high-lightning area; California is a low lightning area.)
- Is the facility in a rural or urban setting?
- Is the facility the tallest building around?
- Is the facility at the end of the utility grid?
- If it is an existing facility, what is its power quality history?

Based on the above information, and taking into account the cost of protection, the following is a good rule of thumb: a surge suppressor with a surge current capacity in the range of 100kA to 300kA would be used in conjunction with a service entrance panelboard or switchboard. A surge suppressor with a surge current capacity in the range of 100kA to 200kA would be used in conjunction with a downstream panelboard.
Siemens SPD Team
Services and Support

Our Commitment to You

Pre-Bid Support

- Over 1000 jobs are downloaded per month from the Electronic Plan Rooms, which provides us with complete take-offs, from drawings & specs.
- Notifications are sent to the Siemens Sales Engineer and Siemens distributor, listing the jobs bidding in your area.
- Detailed quotes with product information are sent to the Siemens Sales Engineer and Siemens distributor to enter into COMPAS or Industry Mall.
- Prior Approval Packages (PAPs) are sent on any jobs where Siemens Surge Protective Devices are not approved.
  1. Sending PAPs allow us to identify Consulting Engineers who specify Siemens gear but not Surge Protective Devices. This is done in an effort to gain approval.
  2. We have over 27 years of approval history documented in our proprietary database.

Post-Bid Support

Project Tracking to Conclusion

Electrical Contractor Award Notification

- After bid day, we determine which Electrical Contractor won the job.
- Electrical Contractor information is promptly sent to the Siemens Sales Engineer and Siemens Distributor to make sure they are the first to know.

Job Follow Up

- Ensures that you are competitively priced to win job.
- Shop Drawing Submittals are provided to Siemens Sales Engineer and Siemens Distributor.
- Engineering support is provided for any rejections or questions from Consulting Engineers.

Ongoing Support

- Customized Collaterals (i.e. flyers, handouts...)
- Design Guides
- Proper Product Selection Recommendations
- Competitor Product Comparison
- Specification Interpretation
- Webinars/Lunch & Learns
- On Site Visits
- Seminars at the Factory for CEU/PDH Credits
- 24/7 Online SPD Training via usa.siemens.com/step
- Troubleshooting
- Product Forensics
- Returns

As our commitment to you, the Siemens SPD Team is here to assist you with all of your surge protection needs. Each region is designated with a highly trained representative to provide you with the best support possible.
Thank you...

for choosing Siemens for your surge protection needs.

Your technical support team is here to assist you.
