A new start is born.

The extended generation of SIRIUS Soft Starters.

The Siemens family of SIRIUS Soft Starters has been expanded by the 3RW44 series making soft starting and stopping attractive for a wider array of starting applications. High degree of functionality, the simplest operator control, and extensive diagnostics -- all packaged in a sophisticated design! These are only some of the reasons why the SIRIUS 3RW44 is a great choice for starting and stopping inductive motors.

Features

- Easy commissioning with quick start menu
- Compact design
- Internal bypass
- Internal overload and self-device protection
- Menu prompted, multi-line graphical display
- Voltage, current limit, or the new torque control starting options
- Creep function and combined DC braking
- Profibus DP communication option
- External keypad option
- Programmable inputs and outputs
- Voltage and current measuring with diagnostic capability
- Parameterization software for use with PCs

The 3RW44 comes out-of-the-box with a quick start menu to make initial commissioning and startup in six steps. Here is the quick start menu which allows you to set up your application in order to get up and running quickly. After the initial configuration, the complete menu and parameter structure can be accessed using the easy to use keypad.

Six easy steps to first time commissioning the Siemens SIRIUS 3RW44
