7PG18 - TR-A

High speed tripping Relay

Energy Management.

SIEMENS

7PG18 – TR-A

High speed tripping relay

Features

High speed, positive action
Can be supplied in modular and drawout type case
Robust design for a long, reliable, service life

Description

Type TR-A relays are a range of volt age operated multi-contact attracted armature relays designed to both IEC 255-5 and to BS142. A wide range of models is available to meet the requirements of the electric supply industry.

TR-A2 – High burden to ESI 48-4 EB2 & NGTS 3.6.15, ESI 2.

Table 1 shows the standard relays available.

High burden, TR-A2 series

High burden relays with immunity to capacitance discharge currents. They are also suitable for certain applications where they are remote from the initiation signal. A high burden also permits reliable operation of current operated series repeat relays. TR relays can be provided with a time delayed economy feature, either instantaneous or time delayed, see Table 1.

Technical Information

TR-A2 series relays

Operating time 10ms at rated voltage
Rated voltage Vn 24V, 30V, 48V, 125V, 240Vd.c
Note. 24V and 240V ratings are not part of ESI 48-4
Operating range 50% to 120% of rated voltage

Operating coils of self-reset and economy cut-off relays are rated at 120% of rated voltage. All other operate and reset coils are short time rated well in excess of the operating time of their cut-off contacts. Self-reset relays will reset at not less than 5% rated voltage.

Nominal burdens

Rated Voltage V.d.c	TR2 -
30	43
48	52
125	<150
Reset coil	50

Relays with economy circuits reduce to approximately 14W

Type	No. of contacts	Contact Reset	Operating coil cut-off	Spec	Burden	Case size
TR-A212	20	Self	Economy	EB2	High	4
TR-A214	20	Self	Economy 2s delay	EB2	High	4
TR-A221	20	Hand	Instantaneous	EB2	High	4
TR-A223	20	Hand	40/60ms delay	EB2	High	4
TR-A231	20	Electrical	Instantaneous	EB2	High	4
TR-A233	20	Electrical	40/60ms delay	EB2	High	4
TR-A241	20	Hand and Electrical	Instantaneous	EB2	High	4
TR-A243	20	Hand and Electrical	40/60ms delay	EB2	High	4

Table 1

Ratings

Make and carry continuously:
1250VAa.c. or 1250Wd.c. within limits of 660V and 5A
Make and carry for 3 seconds:
7500VAa.c. or 7500Wd.c. within limits of 660V and 30A

Break;

1250VAa.c. or 100W (resistive) d.c. or 50W (inductive) d.c. within limits of 250V and 5A
Maximum rate of operation, 600 per hour
Indication
TR-A2 relays have a hand reset mechanical flag indicator

Environmental

Temperature

IEC68-2-1/2 and BS2011 (1977)

Operating -10°C to +55°C

Storage -25°C to +70°C

Humidity IEC 68-2-3

56 days at 95% RH and 40°C

Vibration IEC 255-21-1 Class I.

Shock and bump

IEC 255-21-2 and BS142, 1.5.2 (1989). Relays meet the requirements with respect to shock and bump testing for Class 1 severity.

Operational/mechanical life

Relays will withstand in excess of 10,000 operations, within the maximum contact loading specified, at a rate of 600 operations per hour.

Insulation

Relays will withstand:

5kV 1.2/50µs waveform as IEC 255-4

2kV rms 50Hz for 1minute (2.5kV for 1s) between all terminals and earth

1kV rms 50Hz for 1 minute across normally open contacts to IEC 255-5 and BS142
