**Liability statement**

We have checked the contents of this manual against the described hardware and software. Nevertheless, deviations may occur so that we cannot guarantee the entire harmony with the product.

The contents of this manual will be checked in periodical intervals, corrections will be made in the following editions. We look forward to your suggestions for improvement.

We reserve the right to make technical improvements without notice.

# Preface

**Aim of this Manual** The manual is divided into the following topics:

- Notes to SIPROTEC® objects
- DNP V3.0 Device Profile
- Point lists

General information about design, configuration, and operation of SIPROTEC® devices are laid down in the SIPROTEC® 4 system manual, order no. E50417-H1176-C151.

**Target Audience** Protection engineers, commissioning engineers, persons who are involved in setting, testing and service of protection, automation, and control devices, as well as operation personnel in electrical plants and power stations.

**Additional literature** This manual describes the DNP 3.0 Device Profile of the SIPROTEC® devices.

The following additional manuals inform you about the DNP point lists and the function, operation, assembly and commissioning of the SIPROTEC® devices:

Manual	Contents	Order number

### **Applicability of this Manual**

This manual is valid for

- SIPROTEC® devices 7ST61 and 7ST63 with
  - firmware version 4.0 or higher and
  - DNP communication module version 02.00.01 or higher.

For device parameterization **DIGSI® 4 version 4.5 or higher** and DNP standard mappings 3-1 to 3-n (n = device type dependent number of standard mappings) have to be used.

### **Additional Support**

Should further information be desired or should particular problems arise which are not covered sufficiently for the purchaser's purpose, the matter should be referred to the local Siemens representative.

### **Training Courses**

Individual course offerings may be found in our Training Catalogue, or questions may be directed to our training center. Please contact your Siemens representative.

### **Instructions and Warnings**

The warnings and notes contained in this manual serve for your own safety and for an appropriate lifetime of the device. Please observe them!

The following terms are used:

#### **DANGER**

indicates that death, severe personal injury or substantial property damage will result if proper precautions are not taken.

#### **Warning**

indicates that death, severe personal injury or substantial property damage can result if proper precautions are not taken.

#### **Caution**

indicates that minor personal injury or property damage can result if proper precautions are not taken. This particularly applies to damage on or in the device itself and consequential damage thereof.

#### *Note*

indicates information about the device or respective part of the instruction manual which is essential to highlight.

## Warning!

Hazardous voltages are present in this electrical equipment during operation. Non-observance of the safety rules can result in severe personal injury or property damage.

Only qualified personnel shall work on and around this equipment after becoming thoroughly familiar with all warnings and safety notices of this manual as well as with the applicable safety regulations.

The successful and safe operation of this device is dependent on proper handling, installation, operation, and maintenance by qualified personnel under observance of all warnings and hints contained in this manual.

In particular the general erection and safety regulations (e.g. IEC, DIN, VDE, EN or other national and international standards) regarding the correct use of hoisting gear must be observed. Non-observance can result in death, personal injury or substantial property damage.

### QUALIFIED PERSONNEL

For the purpose of this instruction manual and product labels, a qualified person is one who is familiar with the installation, construction and operation of the equipment and the hazards involved. In addition, he has the following qualifications:

- Is trained and authorized to energize, de-energize, clear, ground and tag circuits and equipment in accordance with established safety practices.
- Is trained in the proper care and use of protective equipment in accordance with established safety practices.
- Is trained in rendering first aid.

### Typographic and Symbol Conventions

The following text formats are used when literal information from the device or to the device appear in the text flow:

**Parameter names**, i.e. designators of configuration or function parameters which may appear word-for-word in the display of the device or on the screen of a personal computer (with operation software DIGSI<sup>®</sup> 4), are marked in bold letters of a monospace type style.

**Parameter options**, i.e. possible settings of text parameters, which may appear word-for-word in the display of the device or on the screen of a personal computer (with operation software DIGSI<sup>®</sup> 4), are written in italic style, additionally.

“Annunciations”, i.e. designators for information, which may be output by the relay or required from other devices or from the switch gear, are marked in a monospace type style in quotation marks.

Deviations may be permitted in drawings when the type of designator can be obviously derived from the illustration.

# Notes to SIPROTEC<sup>®</sup> objects

# 1

This chapter contains notes for the use and evaluation of certain SIPROTEC<sup>®</sup> objects which are available via DNP3.0 communication.

1.1	Binary Inputs / Annunciations	1-2
1.2	Binary Outputs / Commands	1-3
1.3	Analog Inputs / Measured values	1-4

*Note*

The description of the standard mappings / point lists (ref. to chap. 3) contains the pre-allocation of the mapping files at delivery or first assignment of a mapping in DIGSI® 4 to the SIPROTEC® device.

Changes of the allocation and the scaling of the measured values are possible in adaptation to the concrete installation environment (ref. to page i).

---

## 1.1 Binary Inputs / Annunciations

*Note*

Depending on the device composition and the existing protection packages not all of the indicated binary inputs or protection annunciations (and corresponding DNP points) may be available in the SIPROTEC® device

---

### 1.1.1 Error with a summary alarm

The "Error with a summary alarm" is ON if at least one of the following internal alarms assumes the value ON:

- "Error 5V", "Error neutral CT", "Error 1A/5A wrong", "Error A/D converter".

**Reference** ref to chap. 3.1.1

### 1.1.2 Alarm Summary Event

The "Alarm summary event" is indicated, if at least one of the following internal alarms assumes the ON status:

- "Error Board 1", "Error Board 2", "Error Board 3", "Error Board 4", "Error Board 5", "Error Board 6", "Error Board 7",
- "Alarm NO calibration", "Failure Battery", "Alarm Real Time Clock",
- "Failure Phase Sequence", "VT Fuse Failure", "Failure Voltage Balance", "Failure Voltage Summation Phase – Ground", "Failure General Voltage Supervision",
- "Failure Current Balance", "Failure Current Summation", "Failure General Current Supervision".

**Reference** ret. to chap. 3.1.1

### 1.1.3 Stop Data Transmission

The functionality "Stop data transmission" is not supported via DNP communication. If "Stop data transmission" is active nevertheless data via DNP will be transmitted furthermore.

The annunciation "DataStop" signals the activation of "Stop data transmission" however and can be evaluated correspondingly in the DNP master.

**Reference** ref. to chap. 3.1.2

## 1.2 Binary Outputs / Commands

### Note

The allocation of the output relays to the switching devices and to the output channels is defined during parametrization of the SIPROTEC<sup>®</sup> devices.

Depending on the device composition there may be less than indicated output relays (and corresponding DNP message points) available in the SIPROTEC<sup>®</sup> device.

### 1.2.1 Single Commands

The command output mode (*pulse output, continuous output*) is changeable for the single commands using parametrization software DIGSI<sup>®</sup> 4.

The switching direction OFF for single commands with *pulse output* is not permitted and is rejected in the SIPROTEC<sup>®</sup> device.

**Reference** ref. to chap. 3.2.3

### 1.2.2 Control mode REMOTE

Control mode with control authority is REMOTE, option of unlocked control with DNP.

- Changing the Control mode REMOTE“ to UNLOCKED permits one unlocked control operation via DNP. After execution of the command, the “Control mode REMOTE“ in the SIPROTEC<sup>®</sup> device will automatically be reset to LOCKED.
- A programmed test “Switch in position“ for unlocked control operations will always be executed.

If, after changing the “Control mode REMOTE“ to UNLOCKED, no command is received via DNP for a period of 5 minutes, then the “Control mode REMOTE“ is automatically reset to LOCKED.

**Reference** ref. to chap. 3.2.1

### 1.2.3 Changing the setting group

Switching on one setting group automatically switches off the current active setting group. Transmission of the value OFF is insignificant for the change of the setting group and is refused by the device.

A change of the setting group is only possible via DNP if the parameter **CHANGE TO ANOTHER SETTING GROUP** (parameter address = 302) has the value "Protocol".

**Reference** ref. to chap. 3.2.1

## 1.3 Analog Inputs / Measured values

*Note*

Depending on the device composition not all of the indicated analog inputs (and corresponding DNP message points) may be available in the SIPROTEC® device.

---

The given scaling values for the measured values in the standard mapping apply to installations with the following nominal operating values:

Measurement: Full Scale Voltage (parameter address 1103):

- >100 ... 1000 kV

Measurement: Full Scale Current (parameter address 1104):

- >10 ... 1000 A

*Note*

Changes of the scaling of the measured values are possible in adaptation to the concrete installation environment (ref. to manual "DNP 3.0 Communication Database").

## 2.1 Implementation Table

The following table gives a list of all objects recognized and returned by the SIPROTEC<sup>®</sup> device.

For static objects, requests sent with qualifiers 00, 01, 06, 07 or 08 will be responded with qualifiers 00 or 01.

Requests sent with qualifiers 17 or 28 will be responded with qualifiers 17 or 28.

For change-event objects, qualifiers 17 or 28 are always responded.

In the table below text shaded 00, 01 (start stop) indicates Subset Level 3 functionality (beyond Subset Level 2), text shaded as 07, 08 (limited qty) indicates functionality beyond Subset Level 3.

### 3.1 Binary Input Points

<b>Binary Input Points</b>			
Static (Steady-State) Object Number: <b>1</b>			
Change Event Object Number: <b>2</b>			
Request Function Codes supported: <b>1 (read)</b>			
Static Variation reported when variation 0 requested: <b>1 (Binary Input with status)</b>			
Change Event Variation reported when variation 0 requested: <b>2 (Binary Input Change with Time)</b>			
Point Index	Name	Description	Class
<b>3.1.1 Diagnosis / General alarms</b>			
0	Device OK	Device is operational and protecting; ON=1, OFF=0	1
1	ProtActive	At least one protection funct. is active; ON=1, OFF=0	2
2	Settings Calc.	Setting calculation is running; ON=1, OFF=0	3
3	Error Sum Alarm	Error with a summary alarm; ON=1, OFF=0 (ref. to chap. 1.1.1)	2
4	Alarm Sum Event	Alarm Summary Event; ON=1, OFF=0 (ref. to chap. 1.1.2)	2
5	Definitive TRIP	Relay Definitive TRIP; ON=1, OFF=0	1
6	Relay PICKUP	Relay PICKUP; ON=1, OFF=0	1
7	Relay TRIP	Relay GENERAL TRIP command; ON=1, OFF=0	1
<b>3.1.2 Internal mode status</b>			
8	DataStop	Stop data transmission; ON=1, OFF=0 (ref. to chap. 1.1.3)	3
9	Test mode	Test mode; ON=1, OFF=0	3
10	Control auth	Control authority; 0=Remote; 1=Local (Activated for devices 7ST63/4 only)	1
11	Control auth	Control authority; 0=Remote; 1=Local (Activated for devices 7ST61/2 only)	1
12	ModeLOCAL	Mode Local; 0=lokal operation with interlocking; 1=lokal operation without interlocking; (Activated for devices 7ST63/4 only)	1
13	ModeLOCAL	Mode Local; 0=lokal operation with interlocking; 1=lokal operation without interlocking; (Activated for devices 7ST61/2 only)	1
14	ModeREMOTE	Mode remote; 0=remote operation with interlocking; 1=remote operation without interlocking	1
<b>3.1.3 Distance protection</b>			
15	21 PICKUP	21 PICKED UP; ON=1, OFF=0	3
16	21 TRPI	21 Distance General TRIP command; ON=1, OFF=0	3
17	21 Dis.Trip Z1	21 Trip in Zone Z1; ON=1, OFF=0	3
18	21 TRIP Z1B	21 TRIP in Zone Z1B; ON=1, OFF=0	3
19	21 TRIP Z1L	21 TRIP in Zone Z1L; ON=1, OFF=0	3
20	21 Trip Z2K	21 Trip in zone Z2 (short circuit); ON=1, OFF=0	3
21	21 Trip Z2L	21 Trip in zone Z2 (overload); ON=1, OFF=0	3
22	21 TRIP Z3K	21 TRIP in Zone Z3K; ON=1, OFF=0	3

## 3.2 Control Relay Output Blocks/Binary Output Status

### Binary Output Status Points

Object Number: 10

Request Function Codes supported: 1 (Read)

Default Variation reported when variation 0 requested: 2 (Binary Output Status)

### Control Relay Output Blocks/Binary Output Status

Object Number: 12

Request Function Codes supported: 3 (select), 4 (operate), 5 (direct operate),  
6 (direct operate, no ack)

Point Index	Name	Description	Supported Control Relay Output Block Fields
<b>3.2.1 Internal commands</b>			
0	Group A	Select setting group A and deactivate setting group B,C,D (ref. to chap. 1.2.3)	Latch On
1	Group B	Select setting group B and deactivate setting group A,C,D	Latch On
2	Group C	Select setting group C and deactivate setting group A,B,D	Latch On
3	Group D	Select setting group D and deactivate setting group A,B,C	Latch On
4	protection act.	Protection activation	Latch On, Latch Off
5	Mode REMOTE	Mode remote control; Latch On = UNLOCKED Latch Off = Locked (ref. to chap. 1.2.2)	Latch On, Latch Off
6	auto-recl. ac.	activation of Auto-reclosure fuction	Latch On, Latch Off
7	79 TH OFF	deactivation of thermal AR	Latch On, Latch Off
8	Defrost OFF	deactivation of defrosting protection	Latch On, Latch Off
9	CAT1 ON	activation of CAT1	Latch On, Latch Off
10	CAT2 ON	activation of CAT2	Latch On, Latch Off
11	CAT3 ON	activation of CAT3	Latch On, Latch Off
<b>3.2.2 External commands (Double commands)</b>			
12	52 Breaker	Trip Breaker switch	Trip, Pulse On (On-Time Fixed)
13	52 Breaker	Close Breaker switch	Close, Pulse On (On-Time Fixed)
